CAREPOINT

Remote Health Information System (USBS)

INTRODUCTION

About e-Health Systems

e-Health systems have started garnering more and more attention during the pandemic. These systems, which shorten the diagnosis time, reduce health expenses, and enable remote examination, have become an important tool, especially for companies with a large number of employees, who want to meet the health needs of their employees and create a health archive of their employees.

As PDI, we have been serving tens of thousands of corporate customers with our e-health system that we have been developing since 2011 and we have developed many online hospital projects. Carepoint is the purest form of these online hospitals and is our wholly owned e-health platform that we offer especially to our corporate customers. After switching to Carepoint, our clients have seen their healthcare costs decrease and employee satisfaction increase dramatically.

Carepoint is available in many languages and offers its customers many advantages thanks to its features. We would be pleased to offer our system to your company and help you to maintain and improve the health of your employees. You can view our presentation to see all the features and benefits of Carepoint.

Benefits of Using CAREPOINT

Become a more efficient company

Lower Health Expenditure

Our customers have seen a decrease in their health expenditures after they started using our system.

Riskless Doctor Consultation

Carepoint completely removes contact risk during the pandemic by allowing patients to see their doctors online.

Less Time Spent on Health Issues

Our system quickens the entire procedure, from getting appointments to finalizing the consultations.

Health Service from the Comfort of Your Home

You can meet your health needs from anywhere in the world, you can receive prescriptions without the need to visit a doctor.

06. For Doctors
07. Mobile Application (iOS & Android)
08. Custom Modules
09. Security
10. About PDI & Our Brands

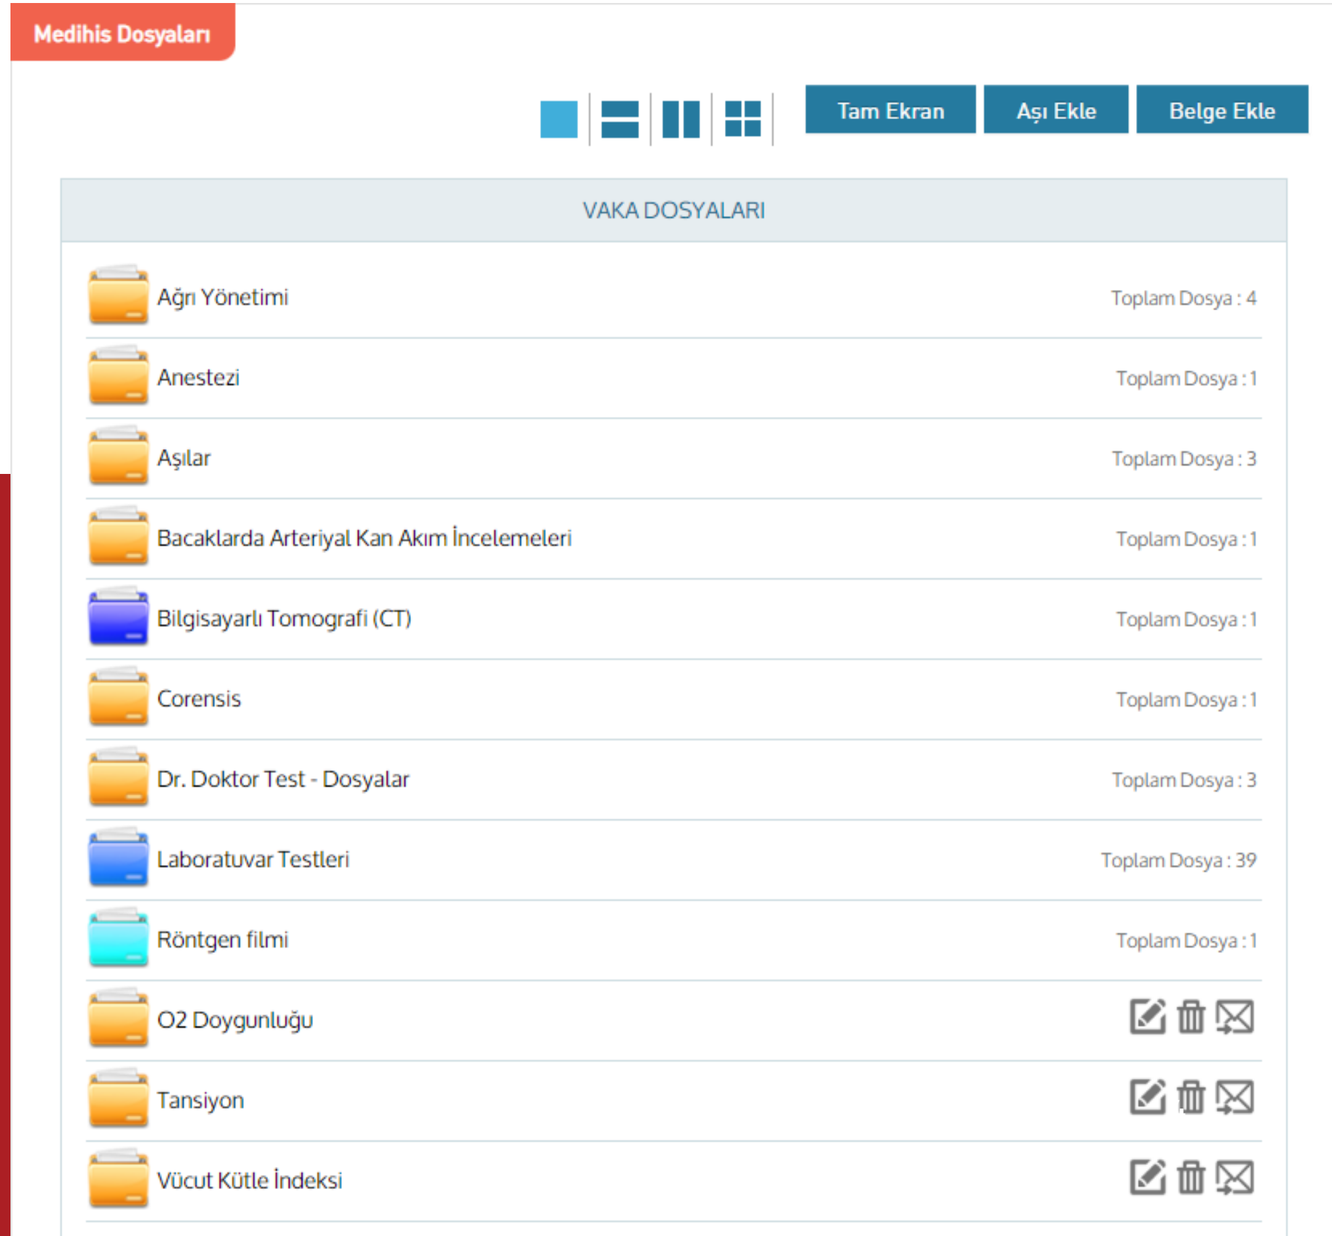
01.

Online Health Archive

Track the state of your health

Users can add blood test, vaccination history, genetic disease, X-Rays, MRI scan, endoscopy, tomography results to their online profiles, and create their complete health profiles in our system. This allows our users to keep track of their health from a single, secure platform, and increases the chance of successful invertentions in case of any emergency.

You can easily reach and share your health profile from anywhere in the world.



Properties of Health Archives

HEALTH PROFILE

After creating your health profile, you can view it from anywhere in the world and share it with your doctors.

GRAPHING AND COMPARING TEST RESULTS

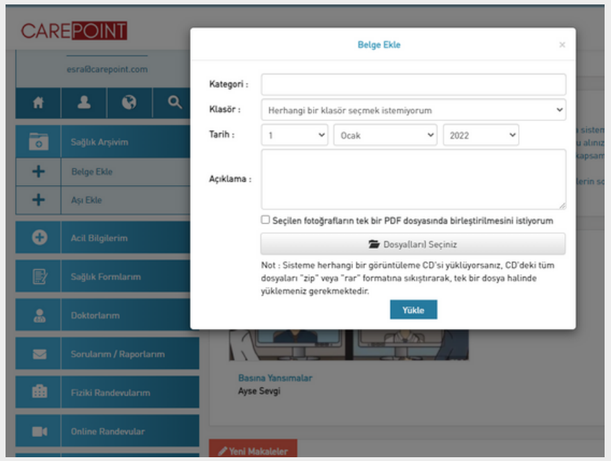
Our system can automatically graph your test results, including their reference values. You can compare multiple tests through these graphs.

EXAMINING MEDICAL IMAGING REPORTS

Our platform allows the viewing and measuring of medical imaging tests such as MRI Scans and X-Rays.

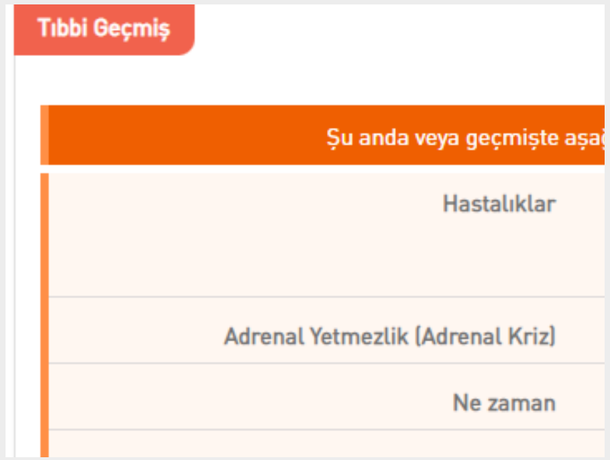
Health Profile

Keep track of your health



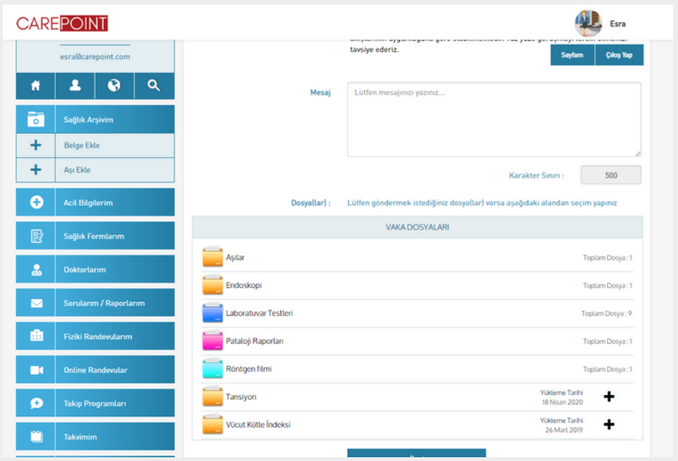
Upload Your Information

Upload various test results, allergies, prescriptions, smoking/alcohol consumption habits to your profile.



Increase the chances of successful interventions

Especially during emergencies, chances of successful outcomes increase because of our patients' ability to share their health profile with doctors.

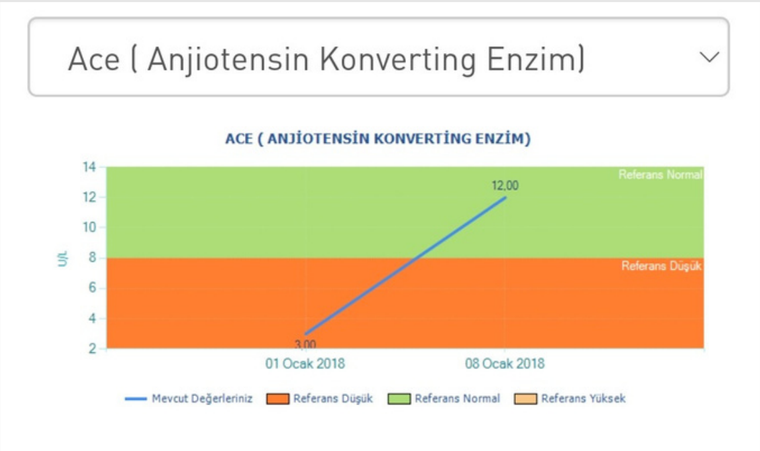


Bilgilerinizi Paylaşın

You can share your health profile or specific results with your doctors from anywhere in the world.

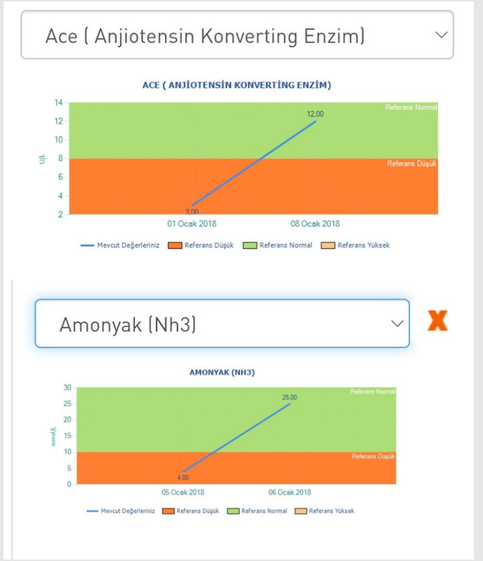
Graphing and Comparing Test Results

Examine Your Health Through Numerical Data



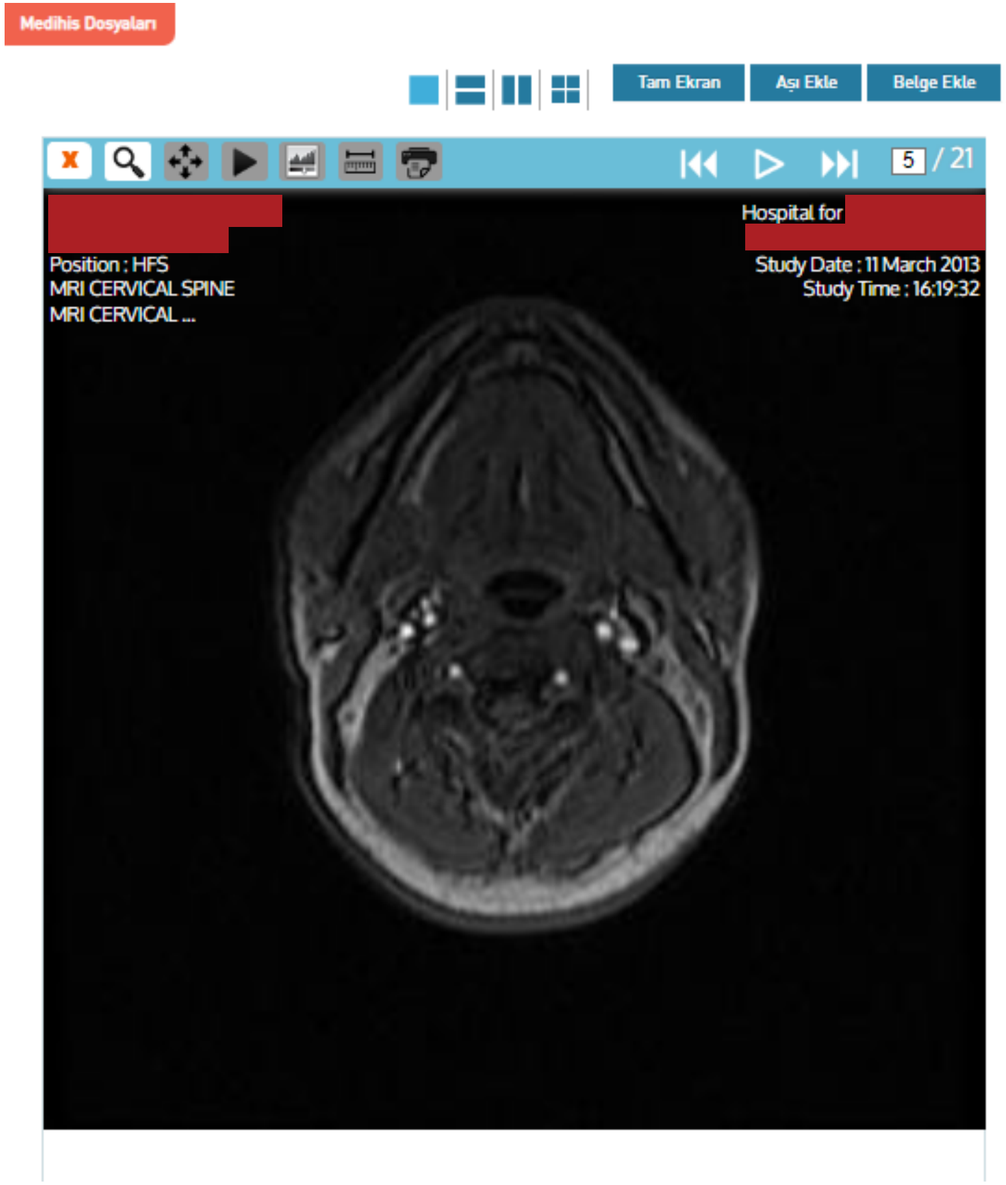
Creating Graphs

All of your test results can be automatically graphed with their reference values shown.



Comparing Graphs

Multiple graphs can be opened on the same screen and compared. This makes it easier to diagnose certain diseases.



Examining Medical Imaging Results

Carepoint allows all medical imaging results to be displayed natively within the system so that our users do not need to multiple different platforms.

After uploading the results of medical imaging methods such as MRI, endoscopy, X-ray, Ultrasound, Tomography etc. to your profile, you can easily open them, share them with your doctors, view the images with Carepoint's tools, stop them at any point and make measurements.

02.

Online Appointment System

CAREPOINT enables all users to make appointments with physicians at any time, and allows organisations to assign a physician to examine their employees.

Doctors can accept or reject requested appointments, or ask patients for various tests or reports before making a decision. Our online appointment system allows both users and doctors to enter the examination fully prepared, to use their time efficiently and to monitor how often and when all employees of the institutions use health services.

1

Choose a Doctor

Choose one of the doctors defined / assigned to you

2

Check Your Doctor's Calendar

See when your doctor is available and choose a day and time that suits you.

3

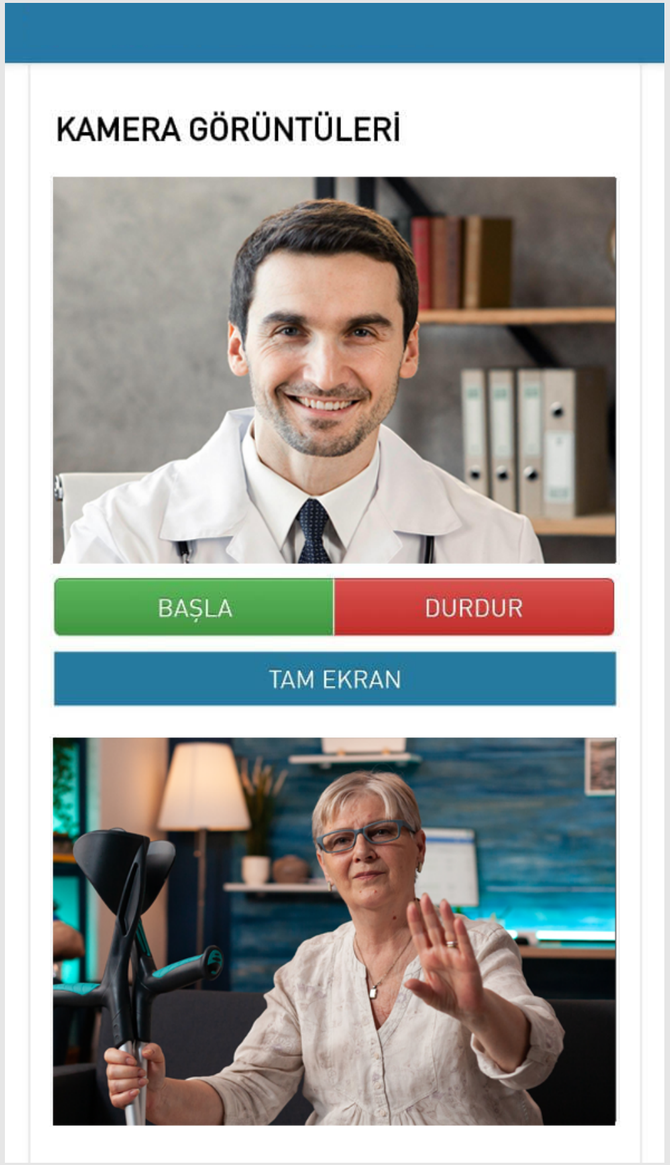
Prepare for Examination

If your doctor asks for various information or tests, share them from your health archive.

4

Wait for Your Doctor's Approval

When all preparations are completed, your doctor will give you approval for the online consultation.



03.

Video Consultations

Chat with your doctor from anywhere in the world

All of our users can see their doctors from anywhere in the world, using our video call system. Per our users' request, other doctors or translators can join the call as well.

04.

Preventative Medicine

Share your health profile with your doctor

By sharing your health profile with your doctors, you can allow them to examine which ailments your genetic disposition or lifestyle choices might cause in the future.

After these examinations, doctors can give you dietary recommendations, educational material and/or directly work with you to change your lifestyle.

05.

Corporate Doctor Service

Benefit from our corporate physician service for your company

For our customers who want to use our platform more effectively, we can offer corporate health services through our physicians who have expertise in many different fields that we have contracted as PDI.

In addition to corporate physicians, we also offer the services of our industry professionals, such as employee psychologists, dieticians and even yoga instructors, to our customers at a discount or free of charge (depending on the terms of the agreement).

06.

For Doctors and Health Institutions

1

Reach Your Patients

You can reach all of your patients from the "My Patients" section in your profile.

2

e-Reçete ve e-Nabız Integration

Write prescriptions to your patients online thanks to our platform approved by the Ministry of Health and integrated with e-Nabız.

3

Request Reports / Tests Before Consultations

You can prepare for your consultations by asking for information from your patients, or examining the health profiles that were shared with you.

4

Online Courses

If there are any mandated training you need to give the employees or your patients, you can do it through Carepoint.

07.

Mobile Applications

iOS & Android Applications

Carepoint has iOS and Android applications for our users to be able to easily use our system.

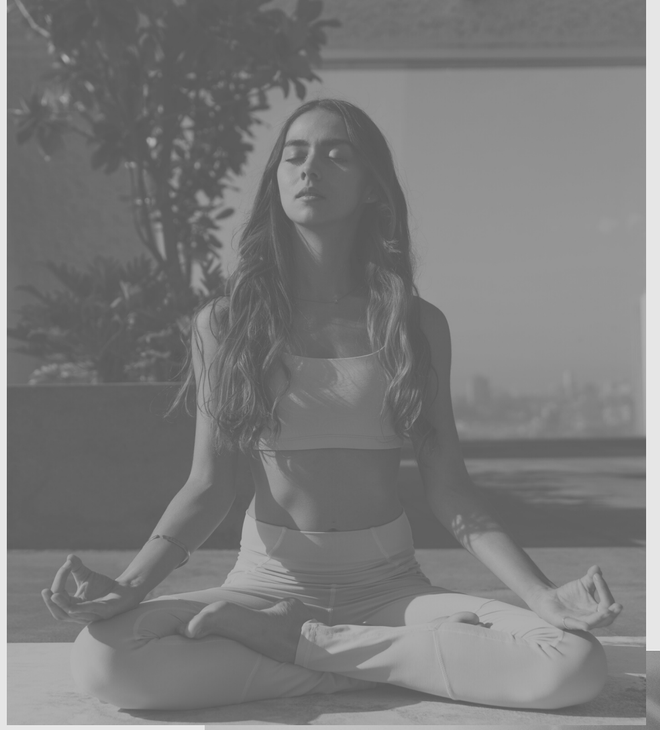
08.

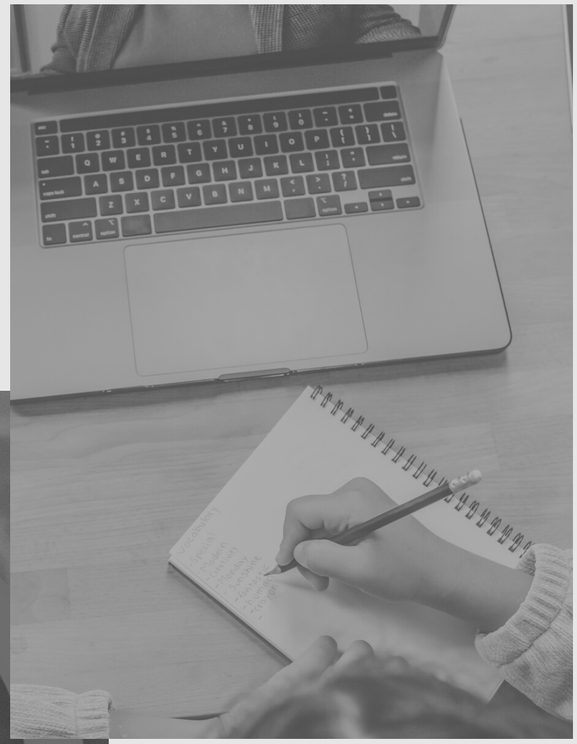
Custom Modules

We can create custom modules that fit your specific needs

As a software company, we can adapt our platform to your needs.

All of our modules and systems are created in accordance with local laws, and guarantee users and companies' data security.





09.

Security

We use everything we've learned over our 25 years of work experience to ensure the safety of our users' valuable information.

Carepoint has been created in accordance to all the modern laws and rules that govern the safety standards of e-health platforms.

Republic of Türkiye Ministry of Health Certified

CAREPOINT provides services with high confidentiality and security standards within the framework of HIPAA rules determined by American Federal Laws. It serves with encrypted, secure servers.

An encrypted SSL VPN tunnel is used during uploads.
